

**British  
Society of  
Echocardiography**

# Advanced Imaging Day

Royal Society of Medicine, London  
1st April 2011

## Advanced Imaging in Cardiac Sources of Embolism

### **Session 1: *Advanced Imaging in the Treatment of Atrial Fibrillation***

Anatomical considerations of the left atrial appendage

What to look for when assessing a patient with atrial fibrillation: role of echocardiography

Imaging the Left atrium: role of CT pre-AF ablation

Indications for AF ablation and how it's done

### **Session 2: *Advanced Imaging in Left Atrial Appendage Occlusion***

Indications for LAA closure: what's all the fuss about?

Pre/peri-procedural imaging for: role of TOE

Percutaneous closure of the LAA: how it's done

### **Session 3: *Advanced imaging in the Treatment of Cardiac Masses***

Anatomical considerations of cardiac masses

What is the role of imaging?

Role of CMR

Role of echo

Role of CT

What the surgeon wants to know

**The early registration fee is £45 until 18th March 2011. Standard/Onsite registration will be £55.**

**Please visit the Cardiology section of the RSM Events Page at [www.rsm.ac.uk](http://www.rsm.ac.uk) or the Training Courses section of [www.bsecho.org](http://www.bsecho.org)**
