

The 5th Aspiring Interventionist

Live Case Day with Simulator Training

A course for **Trainees** and **Consultants** embarking on training in percutaneous coronary intervention

An interactive course with

- Live cases
- Mentored simulator training
- PCI angio review sessions
- Maximum 12 delegates
- Emphasis on practical skills

The course is designed for Cardiology trainees who have already achieved a level of competency in **diagnostic cardiac catheterisation** and are considering sub specialty training in **interventional cardiology**. Some previous exposure to **coronary intervention** as second operator is desirable but not essential. It will also be valuable for existing consultants who are retraining in PCI.

Topics Covered

- Guide / wire / device selection – how, when, and why
- Diagnostic devices – IVUS / Pressure wire
- Adjunctive pharmacology – key trial data
- Clinical Indications – key trial data
- Minimising complications

Course Fee

UK Specialist Trainees - Free

Consultants and non UK Trainees - £250
